

Length of LED you can connect to 1 power supply:
Power consumption LED strip per meter divided by the total power of the power supply

For example:
Power consumption LED strip High Output: 12W/meter
Power supply: 200W
200W/12W = 16,6 meters

Because of voltage drop you cannot connect 16,6 meters on 1 powercable
-> For this pixelstrip you can connect on 1 powercable: 7,5 meters
